## Industry Members, Facility Representatives, and Company Information

10.07.2021

### **Afton Chemical**

[www.aftonchemical.com](http://www.aftonchemical.com)

Hari Sundaram

*The Afton Chemical Corporation Houston Plant is a subsidiary of NewMarket Corporation and is a manufacturer of performance additives for gasoline, motor, & engine oils.*

### **Air Products LLC**

[www.airproducts.com](http://www.airproducts.com)

Brian Farhadi

*Air Products Pasadena plant produces steam for Sekisui and hydrogen gas for Air Products pipeline that supplies customers from Houston to New Orleans.*

## **Albemarle Corporation Pasadena Plant**

[www.albemarle.com](http://www.albemarle.com)

Lisa Fruge

*Albemarle Corporation is a specialty chemical company. Albemarle's Pasadena plant produces catalysts used to make a variety of plastics, additives that go into finished plastics, and chemical intermediates which are further processed by other companies into agricultural active ingredients.*

## **BASF Pasadena Plasticizer Site**

[www.basf.com](http://www.basf.com)

Wendel Langley

*BASF Pasadena site manufactures plasticizers used to provide flexibility in PVC products, and Oxo alcohols used to make acrylates and plasticizers.*

## **Chevron Pasadena Refinery**

<http://www.chevron.com/orphan-pages/pasadena-refinery>

Matt Postage

*Chevron Pasadena Refinery is a petroleum refinery. We manufacture fuels and petroleum feedstocks.*

## **Chevron Phillips Chemical Company LP**

[www.cpchem.com](http://www.cpchem.com)

Andy Woods

*At the Chevron Phillips Chemical, Pasadena Plastics Complex, we produce over two billion pounds annually of polyethylene. Our products are used in applications ranging from pressure pipe, gas tanks, soap and detergent bottles, food packaging and films. Chevron Phillips Chemical is a joint venture company formed in 2000 and is owned by both Chevron and Phillips 66. The Pasadena site has been in operation since 1949.*

## **Enterprise Products**

[www.enterpriseproducts.com](http://www.enterpriseproducts.com)

Mark Roberts

*Enterprise Products Purity Isobutylene Plant and Pasadena Products Terminal refines high purity isobutylene that goes into products like tires, cell phone plastics and lubricants and is a terminal that loads tank cars, trucks and barges for the chemical and oil/gas industry.*

## **Ethyl Corporation Houston Plant**

[www.ethyl.com](http://www.ethyl.com)

Antonio Salinas

*The Ethyl Corporation Houston Plant is a subsidiary of NewMarket Corporation and is a manufacturer of performance additives for aviation and diesel fuels.*

## **Evonik**

[www.evonik.com](http://www.evonik.com)

Nathan Locklar

*The Evonik Pasadena site produces specialty chemicals like polyurethanes and epoxies that go into various everyday products like foam insulation, memory foam and shoe soles.*

## **Gulf Coast Authority**

[www.gcatx.org](http://www.gcatx.org)

Denise Ehrlich

*The Gulf Coast Authority (GCA) Washburn Tunnel Facility is a regional industrial wastewater treatment facility. We treat wastewater from the City of Pasadena and various local industries along the Houston Ship Channel to a quality suitable for discharge.*

## **INEOS Phenol**

[www.ineos.com](http://www.ineos.com)

Amy Narvaez

*The INEOS plant in Pasadena manufactures Cumene. Cumene is a precursor to Phenol. Phenol is used in the production of plastics and nylon.*

## **Intercontinental Terminals Company (ITC)**

[www.ityerm.com](http://www.ityerm.com)

David Wascome

*ITC Pasadena currently employs 75 ITC associates, with four shifts of 11 associates to provide 24/7 coverage. In addition, approximately 160 resident, maintenance and construction contractors are employed at our Pasadena site to provide and meet ITC's needs. ITC's Pasadena terminal currently has approximately 6.7 million barrels of storage available. The products handled are petrochemicals and petroleum products. The facility has three docks capable of handling ships and barges and one dock capable of handling barges, plus rail and truck capabilities. The terminal is connected to the Explorer and Colonial pipeline system, as well as to multiple refineries and plants in the area.*

## **Kinder Morgan Export Terminal (KMET)**

[www.kindermorgan.com](http://www.kindermorgan.com)

David Koetter

*The Kinder Morgan Export Terminal does not make any product. Terminal only has storage tanks for product such as gasoline, jet fuel, and diesel. The product is then loaded on ships for export, or barges for domestic use.*

## **Kinder Morgan Terminal LLC, Pasadena Texas Gulf Liquids Region**

[www.kindermorgan.com](http://www.kindermorgan.com)

Robert Hammons

*The Kinder Morgan Pasadena Terminal does not make or own any products. We lease tank storage space and provide logistics for transporting products all over the United States and other countries via Pipelines and vessels.*

## **LyondellBasell's Houston Refining LP**

[www.lyondellbasell.com](http://www.lyondellbasell.com)

Chris Matthews

*LyondellBasell's Houston Refinery has a rated capacity of 268,000 barrels per day of crude oil which is processed into reformulated gasoline and ultra-low-sulfur diesel, as well as other high-value products such as jet fuel, aromatics, lubricants, and petroleum coke.*

## **Oxy Vinyls Houston Operations Pasadena PVC Plant**

[www.oxy.com](http://www.oxy.com)

Scott Halbrooks

*OxyVinyls, LP (OxyVinyls) is a wholly-owned subsidiary of Occidental Chemical Corporation (OxyChem). Together, OxyVinyls and OxyChem are leading North American manufacturers of polyvinyl chloride (PVC) resins, chlorine and caustic soda – key building blocks for a variety of indispensable products such as plastics, pharmaceuticals and water treatment chemicals. OxyChem and OxyVinyls were among the top producers in the U.S. in 2017 for principle products they manufacture and market. OxyChem is based in Dallas. OxyVinyls is a major producer of vinyl products, including PVC and its precursor, vinyl chloride monomer (VCM). PVC is the second-largest commodity plastic and is used in piping, electrical insulation, construction materials and automotive products. OxyVinyls is committed to safeguarding the environment and protecting the safety and health of our employees and neighboring communities.*

## **PCI Nitrogen LLC**

[www.pcicorp.net](http://www.pcicorp.net)

Scott Lange

*PCI Nitrogen, LLC is primarily a fertilizer manufacturing facility. Major fertilizer product is ammonium sulfate, a solid, granular fertilizer used in the commercial farming sector. Other products include ammonium thiosulfate, a liquid fertilizer and sulfuric acid which is used in many chemical processes and other manufacturing operations.*

## **Sekisui Specialty Chemicals America LLC**

[www.sekisui-sc.com](http://www.sekisui-sc.com)

Charlie O'Rear

*Sekisui Specialty Chemicals America Pasadena Plant produces Polyvinyl Alcohol (PVOH) Vinyl Acetate Monomer and co-produces Acetic Acid or Methyl Acetate depending on business conditions. The main application of our PVOH is in the manufacture of Polyvinyl Butyral (PVB) which used in the manufacture of interlayer film in automobile windshields and architectural glass. The film prevents the glass from shattering on impact. We strive to safely make PVOH in an environmentally friendly way that meets our customer's highest quality standards.*
