Afton Chemical

www.aftonchemical.com

Hari Sundaram

The Afton Chemical Corporation Houston Plant is a subsidiary of NewMarket Corporation and is a manufacturer of performance additives for gasoline, motor, & engine oils.

Air Products LLC

www.airproducts.com

Brian Farhadi

Air Products Pasadena is a steam methane reformer that produces hydrogen for the Air Products pipeline that supplies customers from Houston to New Orleans. It additionally produces steam for Sekisui and Evonik.

BASF Pasadena CP/N Site

www.basf.com

Abe Ahmed

2-ethylhexanol and DOTP plasticizer are manufactured at the Pasadena site. 2-EH is used by the site to make DOTP plasticizer which improves PVC properties such as flexibility and durability.

Chevron Pasadena Refinery

<https://pasadena.chevron.com>

Joe Ebert

Chevron Pasadena Refinery is a petroleum refinery and manufacturer of fuels and petroleum feedstocks.

Chevron Phillips Chemical Company LP

www.cpchem.com

Andy Woods

At the Chevron Phillips Chemical, Pasadena Plastics Complex, we produce over two billion pounds annually of polyethylene. Our products are used in applications ranging from pressure pipe, gas tanks, soap and detergent bottles, food packaging and films. Chevron Phillips Chemical is a joint venture company formed in 2000 and is owned by both Chevron and Phillips 66. The Pasadena site has been in operation since 1949.

Enterprise Products

www.enterpriseproducts.com

Karla Arriaga

Enterprise Products Purity Isobutylene Plant and Pasadena Products Terminal produces and distributes high purity isobutylene that is used for various products, including tires, cell phone plastics, and lubricants. It is a terminal that loads railcars, trucks, and barges for the chemical and oil and gas industry.

Ethyl Corporation Houston Plant

www.ethyl.com

Antonio Salinas

The Ethyl Corporation Houston Plant is a subsidiary of NewMarket Corporation and is a manufacturer of performance additives for aviation and diesel fuels.

Evonik

www.evonik.com

Nathan Boye

This site produces specialty chemicals supporting the polyurethane industry. These components are used in the manufacture of various everyday products like foam insulation, memory foam and athletic shoe soles.

Gulf Coast Authority Washburn Tunnel Facility

www.gcatx.org

Denise Ehrlich

The Gulf Coast Authority (GCA) Washburn Tunnel Facility is a regional industrial wastewater treatment facility. We treat wastewater from the City of Pasadena and various local industries along the Houston Ship Channel to a quality suitable for discharge.

INEOS Phenol

www.ineos.com

Mike Meyer

The INEOS plant in Pasadena manufactures Cumene. Cumene is a precursor to Phenol. Phenol is used in the manufacture of phenolic resins, plastics, nylon and synthetic fibers.) The site also operates a Phenol terminal.

Intercontinental Terminals Company (ITC)

www.item.com

Robert Surguy

ITC Pasadena currently employs 104 ITC associates, with four shifts of 15 associates to provide 24/7 coverage. In addition, approximately 85 resident, maintenance and construction contractors are employed at our Pasadena site to provide and meet ITC's needs. ITC's Pasadena terminal currently has 58 tanks capable of storing approximately 6.7 million barrels. The products handled are petrochemicals and petroleum products. The facility has four docks, three capable of handling ships and barges and one capable of handling barges, plus rail and truck capabilities. The terminal is connected to the Explorer and Colonial pipeline system, as well as to multiple refineries and plants in the area.

Ketjen

www.ketjen.com

Lisa Fruge'

Ketjen Limited Liability Company is a specialty chemical company. Ketjen's Pasadena plant produces catalysts used to make a variety of plastics, additives that go into finished plastics, and chemical intermediates which are further processed by other companies into agricultural active ingredients.

Kinder Morgan Export Terminal (KMET)

www.kindermorgan.com

Christopher Dale

The KMET terminal is utilized as a petroleum storage facility by local refineries and oil companies. Terminal site includes 10 storage tanks used for Gasoline, Jet Fuel, Diesel, and MTBE. Terminal has a ship and a barge on the Houston Ship Channel used for domestic and international shipping of refined products and has various pipeline connections that can be used to transfer product

throughout the United States.

Kinder Morgan Pasadena Terminal

www.kindermorgan.com

Robert Hammons

Kinder Morgan is the largest independent terminal operator in North America, providing a strong, reliable network of 146 terminals serving our customers' storage, distribution, blending and logistical needs. Our terminals store and handle petroleum products, chemicals and other products. The Pasadena terminal has the largest connectivity on the Houston Ship Channel with over 22 million barrels of refined petroleum product storage. The terminal operates 7 vessel and barge docks, 27 inbound and outbound DOT pipelines to include Colonial and Explorer pipelines and services the Kinder Morgan Jefferson Street Truck facility, which supplies the majority of Houston area gas stations.

LyondellBasell Houston Refinery

www.lyondellbasell.com

Clint Titzman

LyondellBasell's Houston Refinery has a rated capacity of 268,000 barrels per day of crude oil which is processed into reformulated gasoline and ultra-low-sulfur diesel, as well as other high-value products such as jet fuel, aromatics, lubricants, and petroleum coke.

Next Wave Energy Partners

www.nextwaveenergy.com

Shane Presley

Next Wave Energy Partners is an on-purpose alkylate-producing facility. In this facility, ethylene is first converted to butylene in a dimerization process and then butylene further processed in an alkylation plant to produce ~32,000 bpd of high-octane, low vapor pressure alkylate.

OxyChem Houston Operations Pasadena PVC Plant

www.oxy.com

Eric Delgado

OxyVinyls, LP (OxyVinyls) is a wholly-owned subsidiary of OxyChem. Together, OxyVinyls and OxyChem are leading North American manufacturers of polyvinyl chloride (PVC) resins, chlorine and caustic soda – key building blocks for a variety of indispensable products such as plastics, pharmaceuticals and water treatment chemicals. OxyChem and OxyVinyls were among the top producers in the U.S. in 2021 for principal products they manufacture and market. OxyChem is based in Dallas. OxyVinyls is a major producer of vinyl products, including PVC and its precursor, vinyl chloride monomer (VCM). PVC is the second-largest commodity plastic and is used in piping, electrical insulation, construction materials and automotive products. OxyVinyls is committed to safeguarding the environment and protecting the safety and health of our employees and neighboring communities.

Sekisui Specialty Chemicals America LLC

www.sekisui-sc.com

Jeff Thompson

Sekisui Specialty Chemicals America Pasadena Plant produces Polyvinyl Alcohol (PVOH) Vinyl Acetate Monomer and co-produces Acetic Acid or Methyl Acetate depending on business conditions. The main application of our PVOH is in the manufacture of Polyvinyl Butyral (PVB) which used in the manufacture of interlayer film in automobile windshields and architectural glass. The film prevents the glass from shattering on impact. We strive to safely make PVOH in an environmentally friendly way that meets our customer's highest quality standards.
